

# Structured Dialogue on Financing (SDF) 

# Financing UN Women for Purpose 

Second Annual Session of the Executive Board 10 Sep 2018

## UN Women Operates in a Changing World

The UN however remains a force-multiplier for States, addressing global challenges that - due to their complexity and cost - no single State can confront on its own

After a decade marked by several economic crises, "in 2017 global economic growth is estimated to have reached 3.0 per cent, a significant acceleration compared to growth of just 2.4 per cent in 2016 and the highest rate of global growth recorded since 2011

The global political climate has become less supportive of multilateralism
Shrinking space for human rights and gender equality activism
Impact on Funding and Financing

- The largest share of UN's +/- \$50 b a year revenue still comes from governments
- 78\% of contributions are made directly by Governments and another 9\%, or a record high of $\$ 2.6$ billion, by the European Commission
- For many United Nations funds and programmes, as for UN-Women, RR contributions are declining.
- RR share of total funding dropped from $37 \%$ to $22 \%$ and the RR share for development-related activities fell from $41 \%$ to $28 \%$

## The SDF Challenge - financing results for women

"If you find
yourself in
a place that
allows you to
make a real
difference
in other
women's
lives,
obstacles will
not stop you
anymore"

Solomon Islands

"[Previously] decision-making positions were held by men and we never saw the benefits. Now seeing women as strong, it motivates me"

## And in 2017...

- 7,000 women leaders, aspiring candidates and elected public official were trained in 32 countries
- 121 crisis-affected women and girls assisted in 31 countries
- 23 experts deployed to support sexual and genderbased violence investigation in 11 countries

- 51 countries benefited from economic services including social assistance and employment services
"Since 2014, an additional 2 billion women and girls live in countries where policy frameworks for women's economic empowerment were strengthened. Over 1.5 billion women and girls are better protected from violence through stronger legal frameworks. More than 1.48 billion women and girls are benefitting from an increase in budget allocations for gender equality and women's empowerment."

## The SDF Challenge

Raising \$2 Billion to Finance the Strategic Plan (2018-21)

## Financing Theory of Change

If funded for purpose, UN Women will
help governments deliver more transformative outcomes for women \& girls and accelerate delivery of the 2030 Agenda in ways that leave no one behind.
"When women rise, countries rise, and the world rises"
