Management Response: Corporate Evaluation of UN-Women's Contribution to Governance and National Planning

Zohra Khan
Chief a.i. *Leadership and Governance Section*

Integrated Policy Support

UN-Women to develop an integrated policy and programme package to support national governments with gender-responsive GNP as a central platform.

Action: Develop evidence-based policy and programme package, and corresponding tools, on GNP to support UN-Women ROs, COs and UNCTs to deliver technical assistance to national governments.

Coordinated Policy Support

Leverage coordinated UN support to national governments on governance and national planning, with UN-Women providing leadership and expertise in the area of gender-responsive GNP.

Action: Strengthen gender analysis and support integration of GNP into MAPS and integrated financing frameworks; review good practices of UNCT/gender results groups in anchoring GNP in UNSDFs and develop guidance for joint programming.

HIV Planning and Budgeting

UN-Women to determine intended relationship between GNP and support to gender-responsive HIV/AIDS planning and budgeting.

Action: Undertake an internal review of UN-Women's work on HIV to refine the approach, based on its strategic value added, and incorporate results into integrated package of support.

Knowledge Management

UN-Women to continue the drive to support knowledge management for GNP, including in the area of HIV/AIDS and sector-related work.

Action: Identify knowledge gaps and prepare KM plan for gender responsive GNP; conduct webinars with ROs and COs to strengthen capacity for improved integrated policy support and programming.

Reporting for Results

UN-Women to accelerate use of Results Management System, to more clearly articulate results achieved through UN-Women's support, and to gain insight into what is working and how.

Action: Develop a new system for supporting project management with a project module to build the repository of information on UN-Women projects at HQ, regional and country levels.

Civil Society Engagement

UN-Women to work proactively through ROs and COs to support consistent civil society engagement on budget monitoring.

Action: Collect qualitative data on successful practices of civil society monitoring and evaluating gender responsive GNP and prepare guidance on best practices in sustaining engagement.

Measuring Impact on Women

UN-Women to support national partners, to put in place systems to measure the impact of gender-responsive GNP on the lives of women, especially the most marginalized.

Action: Provide ongoing technical support to strengthen reporting on impact level results, particularly from local level GNP implementation; and examine causal links between changes in plans/budgets and impact level results.

Financial Resources

UN-Women to review the use of core funding and consider how it can best be used to enable strategic planning and delivery on GNP.

Action: Review conducted to assess allocation of core resources across the Entity on appropriate usage to enable delivery on Strategic Plan 2018-2021 Outcome 2.
