Global Advisory Committee's assessment of the evaluation function in 2016

- IEO is providing inspiring leadership on evaluation within the UN system and more widely through extensive partnerships and networks, maximizing use of UN-Women's limited resources to catalyze and stimulate action on evaluation at all levels.
- The evaluation function in UN-Women has advanced to a high level of performance, with systems and staff capable of sustaining this high standard over time.
- Considerable efforts across management in carrying forward work on evaluation and acting on evaluation findings and recommendations.

- Over the course of the Strategic Plan (2014-2017), significant progress has been made in all key evaluation performance indicators. However, progress varied among regions and certain KPIs requires continuous follow-up.
- UN Women's evaluations have proven valuable to reinforce ongoing work and to inform changes in UN Women approaches and business processes as UN Women transitions into next Strategic Plan
- UN Women's continuous investment in influencing and advocating for integration of gender equality perspectives both within UN System and beyond is yielding positive results
