
Report of the Under-Secretary-General/Executive Director

Planning and Programme Guidance Unit, PPGU
First year of reporting against the new 2014-17 Strategic Plan

All UN-Women field offices also started new country level plans in 2014, aligned with the new Strategic Plan.

Significant reduction in size of this year’s report (from 12,500 words last year to 8,500 words this year). This is at the direction of the Department for General Assembly and Conference Management (DGACM).

The report and its data companion (data annexes) also incorporates reporting against the QCPR, particularly in relation to capacity development and south-south and triangular cooperation.

In order to strengthen results management in UN-Women and improve the quality of performance assessment and results reporting, UN-Women started development of a new results management system (RMS) in 2015.

Development of the RMS will have several phases (agile and iterative development) and be a tool for the follow-up (monitoring) of the execution of programmes and provide an information and decision-making tool with relevant budgetary and financial information on an ongoing basis.

Allows the development of qualitative data on cross-cutting areas such as youth, work with men and boys, south-south, capacity development, innovation etc.
All offices link their results (from their country programmes) with Strategic Plan results from the DRF and OEEF.

They then ‘inherit’ and report on the indicators for that part of the Strategic Plan.

Data is entered by the staff member closest to the work. This is checked and quality assured by the M&E focal point in the office and senior management in the office.

It is then checked again and quality assured by the Regional Office.

Data is then reviewed and any identified issues are addressed by HQ staff.

Before submission, the report and all data and sent back to the field for final validation.

Africa – Distribution of programme expenses by impact areas
✓ Covering a broad spectrum of actions across the UN-Women mandate in under 8,500 words.
✓ Getting the balance right between the presentation of data and the presentation of results stories and examples of progress/success.
✓ Capturing multi-year progress in just the first year of the new Strategic Plan and with all new country programmes.
✓ New indicators in the SP - some of which were very challenging methodologically or proved unworkable.
✓ Normal challenges in presenting contribution to results rather than attribution.
✓ Overall number of indicators (118) with data sources across dozens of offices and programme presences, created vast amount of complex data. This presents challenges with regard to internal capacity.
✓ The new RMS also created an unprecedented amount of qualitative data that can inform decision-making and performance management, but analysis is time-intensive and requires investment.
The organization is in a strong position now to undertake a substantial and useful MTR exercise.

The roll-out of the new corporate results management system has been a success and with investment, has the potential to greatly benefit the organization.

The new data being captured by the RMS should enable even better evaluations of UN-Women’s work in future years.

Future UN-Women reports should be able to present more detailed performance analysis across impact areas and regions, subject to investment in capacity for analysis.
