Highlights from new UN-SWAP 2.0 Indicators

**Strategic Planning Gender-related SDG Results (PI1)**

This new indicator captures high-level results on gender equality and the empowerment of women, as reflected in the main strategic planning documents, which contribute to meeting SDG targets.

ICAO "missed" the requirements for this indicator. To "meet" requirements, ICAO's main strategic planning document must include a high-level result on gender equality, and demonstrate that this result has been achieved.

**Leadership (PI7)**

This new indicator focuses on ways in which senior managers can directly promote gender equality and the empowerment of women.

ICAO "exceeded" the requirements for this indicator. To maintain this rating, Senior managers must continue to proactively promote improvements in UN-SWAP 2.0 Performance Indicators.
