01. Introduction

This Results Framework translates the new Strategic Plan for the UN Trust Fund to End Violence against Women (UN Trust Fund; UNTF) into measurable results. It is a tool to enable the UNTF and stakeholders to monitor progress and achievements, learn lessons, and hold the organization accountable for the funds entrusted to it. Each year the Results Framework will be used to monitor and report on the UNTF’s progress against indicators representing its key areas of work and the UNTF’s contribution to real changes in the lives of women and girls. This data will be used to communicate achievements and lessons learned regularly in the UNTF’s Annual Report and will be further complemented by evidence collected from the evaluations, case studies and testimonials of UNTF beneficiaries.

The UNTF Results Framework is intended as a management tool and working document that will be adjusted and refined each year as data collection, monitoring and reporting improve. For example, due to the competitive nature of the UNTF grant-giving process, it is not possible to fully predict the results that future grantee organizations will propose to achieve, which makes it challenging to set aggregate targets in some areas. To tackle this, the UNTF aims (for the first time) to develop a core set of common, standardized indicators over the next year for projects in similar thematic areas. Once in place, these indicators will enable the selected aggregation of results. However, any specific targets will be subject to modification as new grants are approved or extended each year. Indicators under development are clearly marked as such in the tables.

02. Outline of The UNTF Results Framework And Accountability For Results

The UNTF Results Framework has been structured into four tiers of results (impact, outcomes, intermediate outcomes and outputs). These are intended to represent the results chain set out in the Strategic Plan and how the UNTF’s actions over time will contribute to the broader goal of ending violence against women and girls (EVAW/G). Its structure also reflects the core areas of work set out in the Strategic Plan: the three strategic pathways through which the UNTF can contribute (a) global grant giving (b) the Evidence Hub and (c) global giving for EVAW/G initiatives. In this way, the Results Framework is intended to enable monitoring of the UNTF’s contribution to the impact over time as well as progress against each area of work.

- Tier one (impact level) is intended to monitor how UNTF funds are contributing to the overall vision of a world without violence against women and girls. It includes indicators to measure the incidence of VAW/G in areas targeted by UNTF projects (not population-wide) adapted from the World Health Organization (WHO) methodology and indicators recommended in Bloom’s compendium. It is important to note that grantees will only monitor these indicators if logical and relevant to the project and if feasible, cost-effective and most importantly safe and ethically sound to do so (see the section on data collection below for more information). This data will be complemented with qualitative evidence including the perspectives of women and girls on the impact of UNTF-funded projects on their lives. Impact level indicators may need to be adjusted once the Sustainable Development Goals have been agreed.

- Tier two (outcomes) refers to the results of UNTF-funded projects at the national and local levels under the three main areas of focus: (1) improved multi-sectoral services; (2) effectiveness of legislation and (3) prevention. It is important to note that both outputs and outcomes of grantees projects will be monitored as our portfolio includes projects at different stages of the project cycle (from year one to year three) and therefore some will be unable to report on outcomes in the first year. The UNTF is not solely responsible for these results but it makes a substantial contribution to our grantees’ success as well as that of our partners.

- Tier three (intermediate outcomes) is intended to bridge the results of the UNTF Secretariat at output level (tier four) and the results achieved by grantees, which will also be influenced by the contribution of partners. This level represents the added value of the UNTF to both grantees and United Nations system-wide initiatives on EVAW/G. It includes the key results UNTF aims to achieve under each of the three strategic pathways: (1) grant giving, (2) the Evidence Hub and (3) global giving.

- Tier four (Outputs) represents the results directly attributable to the UNTF including its performance in establishing and maintaining the Evidence Hub, achievements in global resource mobilization and efficiency and effectiveness of UNTF operational management through UN Women and the UNTF Secretariat.

<tr>
<td>Outcome Two</td>
<td>The UNTF creates a platform for harvesting, analysing and disseminating useful lessons from the evaluated results of UNTF projects that measurably inform policy and programming</td>
</tr>
<tr>
<td>Outcome Three</td>
<td>The UNTF creates partnerships and mobilizes support for increased and effective global resourcing and commitments to EVAW/G, including for the UNTF</td>
</tr>
</tbody>
</table>
The following indicators are intended to monitor incidence of violence in the areas targeted by UNTF projects (NOT population-wide) at community level through small-scale surveys. UNTF grantees are, on occasion, already conducting similar small-scale surveys and the intention, therefore, is to standardize the approach based on best practice, in the most ethically sound and safe manner. These indicators are based on those recommended by the WHO (multi-country study questionnaire, DHS module on VAW) and in Bloom's compendium. These indicators will be monitored in all UNTF-funded projects only where it is feasible, logical, cost-effective and, critically, ethically sound and safe to do so, where it is feasible, logical, cost-effective and, critically, ethically sound and safe to do so.

At impact level, many grantees have included indicators to measure the incidence of VAW/G focused on intervention sites (and control group sites) collected through small-scale surveys (questionnaires) of the women and girls targeted by UNTF projects, especially in contexts where national prevalence data is not readily available. This is the first time that the UNTF has developed a Results Framework 2015-2020 that provides legal aid to VAW/G survivors (e.g., before and after training)

**United Nations Trust to End Violence Against Women**

**RESULTS Framework 2015-2020**

**OUTCOME ONE**

**Improved access for women and girls to essential, safe and adequate multisectoral services to end VAW/G**

<table>
<thead>
<tr>
<th>OUTCOMES AND OUTPUTS</th>
</tr>
</thead>
<tbody>
<tr>
<td>GRANTEE RESULTS (AGGREGATED RESULTS FROM UNTF-FUNDED PROJECTS)</td>
</tr>
</tbody>
</table>

- **Availability of social services within an accessible distance (number of women within reasonable accessible distance of a service to support survivors)**
- **Percentage of service providers (individuals) demonstrating best practices/skills for providing services for survivors and those at risk of VAW/G (e.g., before and after training)**
- **Number of multisectoral coordinated referral systems set up and proportion working effectively**
- **Total number of referrals provided between service providers (and/or from community organizations and other organizations) supporting survivors and those at risk of violence**
- **Percentage of women/girls referred and surveyed who report satisfaction with the referral system**
- **Percentage of women surveyed who know of a local organization that provides legal aid to VAW/G survivors**

**The following indicators are examples only. Final indicators will be developed over the next 6-12 months with grantees. Therefore the exact wording may be subject to change.**

- Percentage of VAW/G survivors surveyed who report satisfaction with services/care provided
- Number of women and girls using multisectoral services to end VAW/G (for example, hotlines or one-stop centres)
- Number and percentage of service providers that have improved service provision to end VAW/G
- Percentage of referred cases of sexual and gender-based violence against women and girls that are (i) reported, (ii) investigated and (iii) sentenced
- Percentage of women and girls surveyed who demonstrate knowledge of available social welfare-based VAW/G services (e.g., before and after awareness raising)
OUTCOME TWO
Increased effectiveness of legislation, policies, national action plans and accountability systems to prevent and end VAW/G

- Number of institutions that have increased their institutional effectiveness to prevent and respond to VAW/G with support from UNTF-funded projects
- Number (and types) of actions taken by national/local authorities/policymakers to improve the effectiveness of (a) legislation (b) policies (c) national action plans and/or (d) systems to prevent and end VAW/G with support from UNTF-funded projects
- Number of (a) laws (b) policies (c) protocols and/or (d) national action plans improved to align with international standards on VAW/G (such as law enforcement protocols for dealing with reported cases of VAW/G) with support from UNTF-funded projects
- Number of assessments, diagnostic studies and reports completed and published on VAW/G and proportion which have evidence based on VAW/G with support from UNTF-funded projects
- Proportion of policymakers/public officials demonstrating new skills and knowledge in EVAWG (e.g. before and after training)
- Number of (a) policies or (b) plans showing a clear, comprehensive evidence base on VAW/G with support from UNTF-funded projects
- Number of new or improved databases or systems to collect data on VAW/G
- Number of community/women/youth organizations actively participating in meetings, forums or networks on EVAWG with the authorities and/or policymakers
- Number of functioning and effective platforms for mutual accountability created to prevent and end VAW/G
- Percentage of community stakeholders surveyed who report satisfaction with accountability mechanisms and structures

OUTCOME THREE
Improved prevention of VAW/G through changes in behaviours, practices and attitudes

The following indicators are examples only. Final indicators will be developed over the next 6–12 months with grantees. Therefore the exact wording may be subject to change.

- Percentage of VAW/G survivors surveyed who report satisfaction with services/care provided
- Percentage of people surveyed (disaggregated by women, girls, men and boys) who say that VAW/G is unacceptable
- Percentage of men and boys surveyed who believe (a) that men can prevent VAW/G and (b) would take action to prevent it (for example by reporting cases)
- Percentage of people surveyed who say that female genital mutilation/cutting and other harmful practices are unacceptable
- Number of practitioners of harmful traditional practices seeking alternative sources of livelihood
- Percentage of women and girls surveyed who say they would report any experience of unwanted sexual activity and/or violence to the authorities
- Total number of schools with gender education including on VAW/G included in the curriculum
- Number of (a) policies or (b) plans showing a clear, comprehensive evidence base on VAW/G with support from UNTF-funded projects
- Number of small organizations (post-project end) that project results and manage projects due to UNTF support

GRANT GIVING

INTERMEDIATE OUTCOME 1:
Grantee organizations achieve, replicate and scale up results on EVAWG through UNTF-funded projects

<table>
<thead>
<tr>
<th>INDICATORS</th>
<th>BASELINE (2015)</th>
<th>ANNUAL MILESTONES (ACTIVITIES)</th>
<th>TARGET (2020)</th>
</tr>
</thead>
<tbody>
<tr>
<td>1.1. % of grantees with a positive end-of-project evaluation (e.g. that the project goal was assessed as achieved or mostly achieved)</td>

</tbody>
</table>
### Intermediate Outcomes and Outputs (UNTF Results)

#### EVIDENCE HUB

**RESULTS STATEMENT**

**INDICATORS**

1. **% of partners surveyed who report that evidence from UNTF projects (e.g. from evaluations, papers) has informed or shaped policies, programmes or action on EVAW/G**

2. **Evidence of knowledge from UNTF projects informing significant policy, research or other knowledge products (e.g. citations in significant papers)**

3. **% of grantee organizations partnering with research institutions and/or other partners on research and evidence gathering on EVAW/G either during or after the project as a direct result of UNTF funds**

**BASELINE (2015)**

**ANNUAL MILESTONES (ACTIVITIES)**

2015:

- To be developed by mid to end 2015

**TARGET (2020)**

- To be developed by mid to end 2015

#### GLOBAL GIVING

**RESULTS STATEMENT**

**INDICATORS**

1. **% increase in global giving for EVAW/G (in US dollars per year) disaggregated by donor type (public vs. private)**

2. **Number and type of statements/pledges made by key actors (donors, national governments, corporate partners etc) on EVAW/G**

3. **Extent and type of media coverage on EVAW/G around key events (e.g. positive statements about the importance of EVAW/G)**

**BASELINE (2015)**

**ANNUAL MILESTONES (ACTIVITIES)**

2015:

- To be developed by mid to end 2015

**TARGET (2020)**

- To be developed by mid to end 2015

#### OUTPUT 2: EVIDENCE HUB

The UNTF creates a platform for harvesting, analysing and disseminating useful lessons from the evaluated results of UNTF projects, that measurably informs policy and programming

2.1.1. **(a) Number of site visits to the Evidence Hub**

(b) Number of publication downloads

(c) Number and type of registered users (e.g. on mailing list for updates)

2.1.2. Number of knowledge products (on lessons learned from grantees) produced by the UNTF (by type) per year

2.1.3. Number of partnerships brokered by the UNTF for grantees with research institutions, universities and other partners for research and evaluation

2.1.4. **(a) % of total grant-making budget used for impact evaluation and (b) number of impact evaluations of UNTF grants produced**

**BASELINE (2015)**

**ANNUAL MILESTONES (ACTIVITIES)**

2015:

- To be developed by mid to end 2015

**TARGET (2020)**

- To be developed by mid to end 2015

#### OUTPUT 3: GLOBAL GIVING

The UNTF creates partnerships and mobilizes support for increased and effective global resourcing and commitments to EVAW/G, including for the UNTF

2.1.1. **(a) Number of site visits to the Evidence Hub**

(b) Number of publication downloads

(c) Number and type of registered users (e.g. on mailing list for updates)

2.1.2. Number of knowledge products (on lessons learned from grantees) produced by the UNTF (by type) per year

2.1.3. Number of partnerships brokered by the UNTF for grantees with research institutions, universities and other partners for research and evaluation

2.1.4. (a) % of total grant-making budget used for impact evaluation and (b) number of impact evaluations of UNTF grants produced

**BASELINE (2015)**

**ANNUAL MILESTONES (ACTIVITIES)**

2015:

- To be developed by mid to end 2015

**TARGET (2020)**

- To be developed by mid to end 2015
Endnotes

2. Ibid.

3. In line with United Nations definitions, the UNTF uses the term children (girls) to denote all those under the age of 18; special care and provisions must be applied by grantees if interviewing children.

4. “Satisfaction” will be defined and a qualitative assessment tool created to enable grantees to apply and monitor this indicator in a standardized manner, applicable to different contexts.

5. “Improved” will be defined and a qualitative assessment tool created to enable grantees to apply and monitor this indicator in a standardized manner, applicable to different contexts.

7. “Reasonable accessible distance” will be defined by grantees according to context and measured through a standardized methodology (e.g. example survey question).

8. A standardized methodology will be devised for grantees to monitor whether or not best practice / new skills have been demonstrated for different scenarios / services.

9. A qualitative assessment tool will be developed with recommended criteria for measuring institutional effectiveness for grantees to use in different contexts.

10. This indicator will be developed further through a more thorough review of grantees’ focus of work, for example, for work on legal frameworks a more specific indicator could be developed such as whether the legal framework reaches minimum standards with respect to gender equality and violence against women, including whether or not customary laws are in line with the Convention on Elimination of All Forms of Discrimination against Women.

11. This will be based on a definition of an “effective” database; that is, the number of “effective” databases or systems to collect data on VAW/G based on a recommended and standardized qualitative assessment that takes into account how data is entered/validated, frequency of data reporting, accessibility of results, etc.

12. Recommended guidelines and a methodology for defining and measuring “active participation” will be developed, for example, criteria such as “proportion of agenda items that are community-led” or “proportion of actions that are follow-up at subsequent meetings” and so on.

13. A definition of “function and effective” and methodology, including qualitative criteria to assess whether or not the platforms are effective and functioning, will be developed.

14. Indicators on people’s attitudes towards VAW/G will be developed from a recommended standardized survey methodology and questions that generate a composite score across questions on attitudes which can be relevant to different contexts.
