The following three pages capture WMO’s performance on UN-SWAP 2.0 indicators for 2022.

In 2022, WMO met or exceeded the requirements for 7 out of 17 applicable performance indicators.
**UN-SWAP 2.0 PERFORMANCE BY INDICATOR (2021-2022)**

**PERFORMANCE HIGHLIGHTS IN 2022**

**Most significant gains**
- In 2022, WMO met the requirements for seven indicators.
- WMO demonstrated progress in the areas of Programmatic gender-related SDG results, Evaluation, and Knowledge and communication.

**Areas for improvement**
- UN Women encourages WMO to focus on the ten indicators rated as approaching requirements.
In 2022, WMO’s performance was on par with the average performance of entities with a technical focus. However, WMO trailed the combined performance of the overall UN system.

In 2022, WMO met requirements for one more indicator than in 2021. Encouragingly, for the first time since the start of UN-SWAP 2.0 reporting, WMO has successfully implemented the gender mainstreaming strategy in all performance areas, ensuring all 17 indicators are relevant and either approaching or meeting their requirements.
